PYTHON FOR DATA SCIENCE

Roadmap for the Data Science Division

1. PYTHON BASICS

- Variables
- Data types
- Operators
- Input / Output
- Conditions
- Loops
- Functions
- Lists
- Tuples
- Sets
- Dictionaries

2. DATA HANDLING

- NumPy
- Pandas
- Series
- DataFrame
- Reading CSV / Excel
- Filtering
- Sorting
- Grouping
- Missing values
- Data cleaning

3. DATA VISUALIZATION

- Matplotlib
- Seaborn
- Charts & graphs
- Data storytelling

4. STATISTICS

- Mean / Median / Mode
- Variance / Standard deviation
- Probability
- Correlation
- Distributions

5. DATA ANALYSIS PROJECTS

- EDA
- Clean data
- Analyze data
- Visualize findings
- Communicate insights

6. MACHINE LEARNING

- Scikit-learn
- Train / test split
- Regression
- Classification
- Clustering
- Model evaluation

7. REAL PROJECTS

- EDA
- Dashboard
- ML Project

DATA SCIENCE PORTFOLIO
